

# VOKE WILLIAMS O.

*Motto: Give it your all, or never even start it.*

## PERSONAL DATA

**Linkedin :** <https://www.linkedin.com/in/voke-williams/>

**Location:** Lagos

**Email:** [Vokeolomu01@gmail.com](mailto:Vokeolomu01@gmail.com)

**GitHub:** <https://github.com/voke1>

**Phone:** +234 (0) 816 463 7381

## WORK & LEADERSHIP EXPERIENCE

**ABinBev, BELGIUM.**

**JAN, 2023 – DATE**

**Mobile Application Developer, (Hybrid)**

- Collaborated with the UI/UX designers to identify & prioritize user needs and implement new functionalities for the ABinBev logistics super app.
- Integrated Google geolocation API for precise location tracking, & enhancing overall logistics efficiency.
- Utilized the react-native-video package to seamlessly integrate video tutorials within the app, providing an interactive learning experience for drivers.
- Utilized the react-native-camera package to integrate camera functionalities within the app, allowing drivers to capture images or scan documents.
- Implemented automated code deployment to the app store using Fastlane and EAS submit and expo-cli.
- Implemented graph visualization tools using react-native-chart-kit, providing insightful data representation for driver performance metrics
- Integrated Sentry to monitor application performance and error tracking.
- Wrote and maintained unit and integration test using Jest to ensure code quality.
- Worked with the following technologies: Expo, Sentry, Redux, JavaScript, Typescript, Axios, React Navigation, React Animated API, Azure

**SLASHDEV, SEATTLE.**

**MAY. 2021 – JAN 2023**

**React Native Developer, Contract (Remote)**

- Developed key features for Pactive, a lifestyle app promoting social connection, health & wellbeing.
- Designed and Implemented UI animation for enhanced user experience and improvement in user satisfaction.
- Integrated Google Admob for monetization, contributing to a roughly 10% rise in app earnings.
- Implemented deep linking using Firebase Dynamic Links, increasing app downloads by 5%.
- Developed Firebase push notifications using FCM for effective user engagement, increasing user interaction.
- Utilized React Navigation for efficient and intuitive screen transitions, improving user experience and reducing navigation time.
- Integrated Firebase Crashlytics for comprehensive error reporting and optimization, contributing to a 10% decrease in app crashes.
- **Tech Stack:** React Native, Mobx, JavaScript, Git, GitHub, Axios, React Animated API, React Navigation , React Native Testing Library, Typescript.

**TALKSAY, DELAWARE.**

**JUNE. 2020 – MAY 2021**

**React Native Developer, Contract (Remote)**

- Enhanced Talksay, a social networking app for Africans, with key features and improvements, boosting user engagement and app performance.
- Worked on chat functionality using Firebase Messaging, enabling efficient interaction within the app.
- Implemented follow and like features for video content, for improved user engagement.
- Re-implemented animations for consistency and responsiveness on both iOS and Android platforms.
- Worked on app localization using i18n-js, making the app available to a local African audience.
- Integrated Sentry for comprehensive error reporting and optimization.
- Integrated Google Analytics, that provided valuable insights on user engagements, Demographics, app performance and conversation rates.

**THRYBE, LONDON**

**APRIL. 2019 – MAY 2020**

**React Native FullStack Developer (Remote)**

- Contributed to the development of a world-class social network/dating app for Africa that competes with Tinder as part of a remote team.
- Initiated a technical re-architecture of app users profile images to improve app images load time.

- Implemented the payment system using Stripe API, to provide a fast, secure and user friendly system.
- Implemented the social media authentication (signup/login) for LinkedIn, Facebook & Google.
- Wrote unit & snapshot tests using React native testing library to ensure code quality & reliability.
- Contributed to the implementation of the matching algorithm for user profiles to increase user engagement & provide more relevant and compatible matches.
- Implemented group & one-to-one chat feature using react native signalR.
- **Tech Stack:** React Native, Redux, JavaScript, Git, GitHub, Axios, React Animated API, React Navigation, React Native Testing Library, Typescript.

## ANDELA, NEW YORK

NOV. 2018 – APRIL 2019

### React FullStack Engineer (Remote)

- Worked remotely in an **agile** team of 11 developers, developing internal logistic application to cater for staff transportation and relocation
- Participated and contributed Ideas in daily Standups, sprint planning, reviews, and retrospectives.
- Designed, developed & hosted high-quality RESTful APIs on **Heroku** cloud platform.
- Develop stunning & responsive Front-end travel a using React and Redux and Prototyping with Figma.
- Designed & Configured Back-end using **Node.js and Express JS**.
- Developed, deployed & ran application in Docker containers.
- Tech stack: JavaScript, Node.js, Typescript, Postgress, Sequelize ORM, Git, GitHub.

## 21<sup>ST</sup> CENTURY TEHCNOLOGIES LTD, LAGOS

JUNE. 2016 – SEPT 2018

### Datacenter & Cloud Engineer (Onsite)

- Designed, Implemented, and maintained 21CTL AWS and VMware cloud infrastructure, while meeting compliance standards.

## EDUCATION & CERTIFICATIONS

B.SC

Lagos State University, Lagos.

**First Class Honours**

[TripleByte React Engineer - Expert](#)

[PluralSight: React Native - Expert](#)

[AWS Certified Developer, Associate](#)

## RELEVANT PROFESSIONAL SKILLS & EXPERIENCE

### TECHNICAL SKILLS

#### SOFTWARE

- Expert knowledge of JavaScript | Node.js | React Native | React | Redux | Git | GitHub | YARN | Express JS | Draw.io/Lucidchart | Saga | Redux-thunk | React Native Testing Library | Jest | React hook form | Expo CLI.
- Typescript|Mongoose | Android | Sequelize | IOS | Trello & Jira | Mocha | Travis CI | Coveralls | Code Climate | ESLint | Hound CI | JS Doc | Swagger | MVC architectural pattern of web applications | REST architecture & Design of RESTful APIs.

#### CLOUD

- Excellent Understanding of virtualization, cloud computing concepts, AWS & Heroku cloud platform.
- Familiarity with Docker, Serverless architecture, cloud configuration management, cloud infrastructure monitoring & cloud infrastructure provisioning tools.
- Comfort with Linux Terminal, Bash scripting and Windows Server.

### SOFT SKILLS

- Ability to work as part of a team or alone, under pressure and meet deadline with little or no supervision.
- Excellent communication & interpersonal skills.

## SIDE PROJECTS

### EDGE COIN

A cryptocurrency wallet application.

Worked on the Front-end, Back-end, database, and overall app architecture.

Playstore URL: <https://play.google.com/store/apps/details?id=com.edgecoin.app>
